

METHODS AND APPARATUS FOR CONTINGENT TRANSFER AND EXECUTION OF SPOKEN LANGUAGE INTERFACES

Abstract of the Disclosure

5 A method for managing spoken language interface data structures and collections
of user interface service engines in a spoken language dialog manager in a personal
speech assistant. Interfaces, designed as part of applications, may by these methods be
added to or removed from the set of such interfaces used by a dialog manager. Interface
service engines, required by new applications, but not already present in the dialog
manager, may be made available to the new and subsequently added applications.
